

BEW Super Seeder

Super Seeder Manufacturers in India

BEW best Super Seeder comes with direct seeding, which involves the sowing of seeds directly into the soil to achieve germination and establishment, and also consists of a rotor for managing the paddy residues and a zero-till drill to sow wheat. Flail-type straight blades are mounted on the straw management rotor, which cuts (hits or shears) the standing stubble or loose straw coming in front of the sowing time and cleans each tine twice in one rotation of the rotor for proper placement of seed in the soil. The flails push the residues as much as possible between the seeded rows. This PTO-driven super seeder machine can be operated with a 50-hp tractor and can produce over 0.34-0.04 ha/hr.

Why, Super Seeder?

A seed drill tends to be a machine used during farming that propagates seeds for plants by inserting them in the soil and digging them to a certain degree. This ensures that the seeds are distributed equally. The same Super Seeder machine drills the seed only at the seed's right concentration, ensuring that the seeds are largely covered by dirt. KS Super Seeder comprises a rotor for dealing with the paddy buildups and a zero-till drill to plant wheat. Even super seeder price is budget-friendly at Bew India in India.

Thrash-type straight edges are mounted on the straw administration rotor, which cuts (hits/shear) the standing stubbles/free straw coming before the planting prong and clean every prong twice in one pivot of the rotor for appropriate arrangement of seed in the Soil. The thrashes the deposits as surface much between the elegant lines. This PTO-driven machine can be worked with a 50 hp farm hauler and can more than 03-.04 ha/hr. This is the best tractor for super seeder machines as well.
